

## FT-30 pen

From birth to 30 kg

- Very flexible; can be used from birth to 30 kg
- Less transportation of pigs, less stress, better growth
- Suitable for production of welfare pigs
- Extra large piglet nest; place for up to 25-30 kg's pigs
- Transparent cover in the piglet nest - easy to monitor the piglets from outside
- Height-adjustable barrier plate in the piglet nest

# FT-30 farrowing pen

Many years of experience for loose sows

The **FT-30 pen** was designed based on the Norwegian preferences for loose nursing sows. The result is a very flexible pen that can be used from birth to piglets weight of approx. 30 kg.

By applying the “birth to 30 kg” system, you avoid transportation of piglets to the weaner unit. It means a lot less cleaning in comparison to traditional production. At the same time you save the pigs from stress, which gives a better daily gain and feed conversion.

The pen is designed with a transparent lid, so that you can see the piglets without entering the pen. The large piglet nest can be used for piglets up to 25-30 kg. The pen is particularly well-suited for special production of welfare pigs.

## FT-30 PEN - FACTS

Pen length	300 - 340 cm
Pen width	240 - 260 cm
U-profiles, casting	2 mm stainless
Creep box, width	110 cm
Creep box, area	1 m <sup>2</sup>

The FT-30 pen can be constructed in 35 mm board profiles or 10 mm fiber plates.
